PROFESSIONAL SUMMARY

AI Full-Stack Engineer with strong backend engineering expertise, experienced in building enterprise applications, REST APIs, microservices, intelligent document processing systems, and LLM-powered applications. Skilled in Python, TypeScript, Node.js, .NET, FastAPI, React, PostgreSQL, MongoDB, Elasticsearch, and Docker. Experienced in backend modernization, authentication integration, search and retrieval systems, and document-processing workflows. Builds AI applications using retrieval-augmented generation (RAG), vector search, LLM integrations, and agentic workflows, with an emphasis on scalable architecture, reliable APIs, and production-ready delivery.

TECHNICAL SKILLS

Core Tech
Python, TypeScript, JavaScript, C#, SQL

AI & Data Frameworks
LangChain, LangGraph, LlamaIndex, Hugging Face, SQLAlchemy

AI & LLM Engineering
LLMs, RAG, Embeddings, Vector Search, Prompt Engineering, LLM Application Development, Agentic Workflows , AI Evaluation

Databases And Storage
ChromaDB, PostgreSQL, pgvector, MongoDB, Redis, Elasticsearch

Backend Engineering
FastAPI, Node.js, NestJS, Express.js, .NET, REST APIs, Microservices, API Design, Authentication and Authorization

Developer Tools
Git, GitHub, Postman, Swagger, Jira, Azure DevOps, Docker, Linux, RabbitMQ

PROFESSIONAL EXPERIENCE

Software Engineer, Evalueserve 08/2025 – Present | Gurugram

- Develop and enhance enterprise applications, including SearchLego and ViSense, contributing to backend APIs, search functionality, document-processing workflows, authentication integration, and application modernization.
- Build and maintain backend services and REST APIs, working with Node.js, TypeScript, .NET, and data storage technologies across enterprise application workflows.
- Contribute to enterprise document-intelligence initiatives involving document ingestion, content extraction, search and retrieval, and LLM-powered processing workflows.
- Work with Elasticsearch and vector-search approaches to support information retrieval and context aware access to enterprise content.
- Integrate application authentication and authorization workflows, including Azure AD, and support reliable service to service and application interactions.
- Contribute to containerization and deployment workflows using Docker and collaborate across teams to deliver and maintain enterprise software.

Software Engineer Intern, Evalueserve 02/2025 – 08/2025 | Gurugram

- Developed and enhanced modules for an airline ticket booking application using .NET, REST APIs, and database integrations.
- Implemented and debugged application workflows involving user authentication, flight scheduling, passenger information, and booking records.

- Contributed to API development, database operations, testing, and software delivery within an enterprise development environment.

Projects

Persona.AI, AI Character Chat Studio 04/2026 – 05/2026
- **Tech :** Python ,Groq, Streamlit, Docker
- Built an AI character platform enabling configurable personalities, context-aware conversations and consistent character behavior.
- Implemented multi-character conversations, autonomous interactions and debates, with Docker based deployment.

OmniMemory | AI-Powered Personal Knowledge Engine 12/2025 – 02/2026
- **Tech:** Python · FastAPI · LangChain · ChromaDB · Groq · Next.js
- Built a full-stack AI knowledge engine for PDF, DOCX and TXT ingestion, semantic search and conversational querying using **RAG, HuggingFace embeddings and ChromaDB.**
- Developed automated document intelligence for summarization, topic extraction, sentiment and language analysis, with **FastAPI backend and Next.js frontend.**

Airline Booking System , Full-Stack Web Application 04/2025 – 07/2025
- **Tech:** .NET, C#, SQL, REST APIs, Angular
- Developed a full-stack airline ticket booking platform enabling users to search, book, and manage flight reservations through an intuitive web interface.
- Designed and implemented user authentication, registration, and secure session management for personalized booking experiences.

Education

B.E. - Computer Science Engineering, Chandigarh University 08/2021 – 06/2025 | Kharar,Punjab
CGPA: 8.37
